The critics say of this volume:

"This book will interest the reader, both from the dramatic skill with which the story is evolved, and from the novelty of its theme."

"In avele brilliant and faselnating; in graphic picturing, powerful. The author understands how to color, how to deitheate character, how to excite the reader's fancy; and, more, how to couple irresistible humor with trenchant logic. There is a Bulwerism in his style that attracts the attention of the reader, and holds it exchained to the end of the book. In addition to a deep knowledge of human nature, the author discovers a fine sense of dramatic effects. The book is an exciting drama, and though not intended for a sensation, will make one, or we much mistake the taste of our reading public."

"Justice in the By-Ways," a Tale of Life.—Such a book has been long needed. Rich of biling satire, it exposes the vices of the day with an unsparing land. In addition to talent of a varied and very high order, the author exhibits all than potish and refinement of an excellent taste. There may be those whose religious scruples will be a little disturbed at reading act me of the chapters, for the author has net; applied his glecure by overburdening his characters what drapery, but his motto world scene to be. Paint me at a fam, and as turb is strong, so will his book be read. The book is one well worthy a careful persual. We contacted it most heartily to the public, as one from which all readers may derive much benefit and instruction."

"Justice in the By-Ways," is a novel of singularly exciting interest. Its characters stands out bold upon the canvas and have a life like reality about them, which is rare with novels at this day. The scenes, too, are drawn with a brush accusomed to coloring after the rules of dramatic art. 'Daily existence,' Bulwer sald,' was shut out to us by the shadowy giant of Prejudice and fear.' Our author seems not to have been retarded in hi argoes rice in all in deformities. It will excite attention and be generally perused. Society, high and low, in sketched with a second second
